Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Moffa et al.

Moffa et al discloses a physical therapy apparatus to prevent shoulder hiking comprising a shoulder restraint (see “shoulder restraining” in line 14 of col.5, also see Figure 6), the shoulder restraint connected to a connector connectable to a hip stabilizer (Figure 6), the connector defining a fixed distance between the shoulder restraint and the hip stabilizer (Figure 6), wherein the hip stabilizer comprises a seat (Figure 6), wherein the shoulder restraint comprises a strap (Figure 6), wherein the connector is connected to the hip stabilizer (Figure 6), wherein the hip stabilizer comprises a seat (Figure 6), wherein the hip stabilizer comprises a chair (Figure 6).

3. Claims 6-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Godwin.

Godwin discloses a method to prevent a patient from hiking their shoulder while performing physical therapy exercise (Figs.1-5), comprising determining the desired position of the patient’s shoulder and placing the patient’s shoulder at the desired position (16a of Figs.1-2), placing in contact with the patient’s shoulder a shoulder restraint which is immobile relative to the shoulder (Figs.1-3), whereby the shoulder

restraint prevents the patient's shoulder from hiking beyond the desired position (see "limits the range of motion...shoulder" in lines 20-21 of col.1), wherein the shoulder restraint comprises a strap (Figs.1-3), wherein the shoulder restraint is connected to a connector connected to a hip stabilizer (Figs.1-3), whereby the shoulder restraint is maintained relatively immobile (Figs.1-3).

Allowable Subject Matter

4. Claims 9-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Paulson, Lundberg, Rozell, White, Al-Temen et al, McIntyre, Jensen, Wade, Hanoun and Tholkes are cited to show shoulder restrainers.
